IT'S YOUR MOVE

Mechanical aptitude and the desire to learn and succeed are the keys to your future in the diesel field. Good job opportunities are available to well-qualified and well trained graduates.

Most industries currently using large numbers of diesel engines are generally expected to expand their activities in an increasing variety of equipment. This increase in diesel equipment creates a greater need for qualified mechanics and technicians.

You may be eligible for financial aid. Students are able to obtain assistance according to their individual profile. Contact our admissions department today for full course and other school information.

Phone, or use the attached response card.

Let **DIESEL** Training Put **POWER** in Your Future!

CHANGE GEARS NOW, if your job future is going nowhere.

Move ahead with diesel. Half a million autos today use diesel engines. That's just the start. Twice as many trucks have diesel today as five years ago. Marine and oil-exploration uses expand.

Diesel fuel is more efficient fuel that pollutes less. That's why diesel's future is so big. If you have an interest in mechanics, and if you like the vibrating excitement of the well-adjusted diesel — now's

the time to get in on the ground floor of the diesel power generation.

Plan your future with diesel. Train now as a technician, and get aboard as the industry takes off.

HANDS-ON TRAINING

Theory of diesel engines is meshed with hands-on experience. Our training is realistic. The setting is much like in industry.

A fast-paced program acquaints the future technician with all areas of diesel repair, maintenance, failure analysis, diagnosis and troubleshooting.

We ask employers of diesel technicians for input in developing programs that point to growth areas. We translate that growth into hands-on training that leads to opportunity in diesel fields such as marine, automotive, transportation, and oil exploration.

The photos in this brochure, which were not taken at the school, are meant to illustrate some diesel activities.
